

COVID-19 Real Time Report Launch: Patient Activity
 ~ Number of Patient Visits Drop 50% for Some Therapy Areas Post COVID-19~

M3 Inc. (Headquarter: Tokyo, Japan; CEO: Itaru Tanimura; URL: <https://corporate.m3.com/>; “M3,” below) has launched an offering of real time data, reporting patient visitations at clinics to provide better visibility of COVID-19 impact at medical institutions. This is another addition to the existing COVID-19 initiatives currently being undertaken by M3. (Please see Mar 12 press release for details: <https://corporate.m3.com/pressrelease/2020/20200312001555.html>)

This “COVID-19 Real Time Patient Number Report” so far shows dramatic drops in doctor’s office visits by patients as a result of efforts to curb the outspread through self-imposed quarantine, which in turn is significantly impacting drug prescriptions. This report provides accurate, real time data at clinical sites nationwide, based on the proprietary database developed by M3 (data pertains to 26 million patients as of Mar 2020).

The report details the number of patient visits at clinics according to therapy areas, geography, gender, and age groups. Data regarding the prior week is provided on a weekly basis, allowing for timely discernment of current market conditions.
